The general objectives at the initial stage are: -

Methods and Techniques

The techniques used for teaching should promote habits of self-learning and reduce dependence on the teacher. The multi-skill, learners-centered, activity-based approach already recommended for the

previous stages of education, is still in place, though it will be used in such a way that silent reading of prescribed selected texts for comprehension will receive greater focus as one of the activities. Learners will be trained to read independently and intelligently, interacting actively with texts and other reference materials (dictionary, thesaurus, encyclopedia etc.) as necessary. Some pre-reading activity will generally be required, and course books should suggest those activities. It is important to remember that every text can generate different reading strategies.

Students should be encouraged to interpret texts in different ways while presenting their views. Some projects may also be assigned to students from time to time.
